

THE FUTURE ROLE OF BIOFUELS IN THE NEW ENERGY TRANSITION

DISCLAIMER

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the participating parties. The results, analysis, conclusions or recommendations expressed in this book are based upon research projects, published documents, technical presentations, and data gathering conducted by the authors. Finally, the opinions, hypothesis, and conclusions or recommendations expressed in this book are the responsibility of the authors and do not necessarily reflect the vision of FAPESP.

ACKNOWLEDGEMENTS

The authors of this book would like to express their gratitude to the São Paulo Research Foundation (FAPESP) and Editora Blucher for financially supporting this publication. Also, we would like to thank FAPESP for supporting the research projects associated with this publication:

- Diretrizes de Políticas Públicas para a Agroindústria Canavieira do Estado de São Paulo (Process Number 2006/51725-1);
- Bioenergy Contribution of Latin America & Caribbean and Africa to the GSB project – LACAf-Cane Thematic Project (Process Number 2012/00282-3);
- Universidades e empresas: 40 anos de ciência e tecnologia para o etanol brasileiro (in Portuguese) (Process Number 2015/22108-3);
- Technological Roadmap for Sustainable Biofuels for Aviation: the opportunities for Brazil (Process Number 2012/50009-1).

Table of contents

PREFACE	9
AVANT PROPÔS.....	11
OBJECTIVES.....	13
INTRODUCTION	15
1. BRIEF GLOBAL ENERGY OVERVIEW: TRENDS/SCENARIOS AND THE NEW ROLE OF BIOFUELS	21
1.1. Introduction.....	21
1.2. General Background	21
1.3. Energy/Technology trends.....	23
1.4. Energy Scenarios	25
1.5. Biofuel Scenarios {conventional and advanced (G2 and G3) biofuels}.....	27
1.6. Ethanol Fuel.....	28
1.7. Biodiesel	34
1.8. Advanced Biofuels (G2 and G3).....	35
1.9. Hydrogen	42

1.10. Emerging Markets for Biofuels (competition versus complementarity).....	44
1.10.1. Biofuels for aviation.....	44
1.10.2. Biofuels and maritime transport.....	45
1.10.3. Biofuels and fine chemistry (Ethanol chemistry)	46
1.11. Food and Fuel and Land Use	46
1.12. Environmental Issues.....	48
Final Remarks	48
References.....	49
2. HISTORIC BACKGROUND OF BIOFUELS IN BRAZIL.....	51
2.1. Introduction.....	51
2.2. The Ethanol Fuel Utilization in Brazil	53
2.2.1. The early stages of fuel ethanol in Brazil	53
2.2.2. The 1973 oil crisis and the creation of PROALCOOL	55
2.2.3. The New Period (1985-2000): end of subsidies to ethanol and increasing sugar exports	60
2.2.4. The end of sugarcane burning and the flex-fuel engine	61
2.2.5. Important technical and scientific contributions of the sugarcane ethanol sector.....	63
2.2.6. The Paris Agreement and the new role of ethanol in Brazil ...	65
2.3. Biodiesel and the PROBIODIESEL Program	65
2.4. Lessons of Biofuels from the Past 50 Years in Brazil	68
Final Remarks	70
References.....	70
3. THE PRESENT SITUATION OF BIOFUELS IN BRAZIL	73
3.1. Introduction.....	73
3.2. Current Situation of Ethanol in Brazil	75
3.2.1. An overall view of present status of ethanol	75
3.2.2. The present status and opportunities for sugarcane	77
3.2.3. Present demands for anhydrous and hydrous ethanol.....	81

3.2.4. Present situation and mid-term possibilities of bioelectricity in Brazil	82
3.2.5. The economics of sugarcane ethanol	84
3.3. Corn: the new feedstock for ethanol in Brazil	86
3.4. The Present Status of Biodiesel in Brazil.....	88
3.5. Can Eucalyptus be a Feedstock for Biofuels?.....	93
3.6. Solid Urban Wastes (SUW) and its Potential in Brazil	93
3.7. Land Use Opportunities and Biofuels Production	94
3.8. Impacts: agriculture, social, and environment	96
3.9. Biofuels Technological Innovation from Agriculture, processing to Final Use	97
3.9.1. Innovation in Agriculture	98
3.9.2. Innovation in Processing.....	99
Final Remarks	101
References.....	101
4. FUTURE PRODUCTION MODELS OF BIOFUELS IN BRAZIL	105
4.1. Introduction.....	105
4.2. New Production Models for Biofuels.....	105
4.2.1 Second generation ethanol or G2 (using bagasse as raw material); cellulose-based ethanol; cogeneration; bio-oil plants.....	106
4.3. The Expansion of Corn Ethanol in Brazil	115
4.3.1. Land use, deforestation, and GHG emissions from beef cattle in Brazil	115
4.3.2. Corn ethanol in Brazil	117
4.3.3. Possible land use change associated with corn ethanol integration with beef cattle in Brazil	122
4.3.4. Sugarcane with Corn (Flex Distilleries).....	124
Final Remarks	126
References.....	127
5. THE FUTURE OF BIOFUELS IN BRAZIL	129
5.1. Introduction: recent change in habits and possible impacts in transportation in Brazil	129

5.2. Introduction of Electric Cars in Brazil.....	130
5.3. Perspectives for Fuel Ethanol	132
5.3.1. The flex-fuel engines in Brazil	133
5.3.2. What will happen to E100 and E27.5?.....	135
5.3.3. Technological alternatives for fuel ethanol.....	137
5.3.4. How ethanol engines compare with the electric cars?.....	138
5.4. Perspectives for BIODIESEL.....	143
5.5. Emerging Markets for Biofuels	144
5.5.1. Aviation.....	144
5.5.2. Maritime.....	149
5.5.3. Railway.....	152
5.5.4. Biochemistry.....	153
5.6. Sustainability Issues and Global Commitment	154
Final Remarks	155
References.....	156
6. GENERAL CONCLUSIONS	159
Final Thought	166
References.....	168
